### **DETAILED ACTION**

1. Receipt of the Request for Continued Examination (RCE) filed 09/30/2010 is acknowledged. Claims 1-6, 38-40, 43-50 are pending in the application and are presented to be examined upon their merits.

#### ***Claim Rejections - 35 USC § 103***

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1 and 40 are rejected under 35 U.S.C. 103(a) as being unpatentable over NORRIS (US 5,940,811)

Norris discloses, as in claims, a method for managing loan products on a computer (see Norris, Abstract),

Re claims 1 and 40. (Currently Amended) A method for managing loan products on a server, said method comprising the server performing steps of:

receiving by a computer processor of the server a commitment contract, the commitment contract specifying a number of loan products to be fulfilled as a group to satisfy said commitment contract;

automatically managing by said processor one or more underwriting criteria for said loan

products, wherein one of said loan products has a corresponding group of underwriting criteria,

Art Unit: 3693

and wherein automatically managing comprises automatically evaluating the underwriting criteria, calculating and assigning by said processor a fulfillment grade to a funded loan based on data stored in a database of funded loans for said loan products, and automatically executing actions to fulfill the commitment contract according to the underwriting criteria with the specified number of loan products, wherein the fulfillment grade is based on a reliability score for data obtained during a fulfillment process including a verification by the processor of an electronic certificate associated with a borrower of the funded loan; automatically generating by said processor loan documents on the server for said loan products for signature by a borrower when said one or more underwriting criteria are fulfilled; and accepting by said processor one or more electronic certificates of the borrower and biometric signatures of the borrower as a signature on the loan documents.

[see Norris column 2, lines 37+ column 6, lines 45-64]

#### ***Allowable Subject Matter***

4. Claims 2-6, 38-39 and 43-50 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
